

PLUMFLOORED CREATIONS

This swap kit will be a bolt in for 1970-74 E-Bodies. It makes no difference if it is a Challenger or a Cuda, you are lucky to have one. With one of our kits you can make it awesome.

All Kits are divide by fuel induction used then by transmission type.

E.F.I

ELECTRONIC FUEL INJECTION

We offer two primary types of, one is OEM based plug and play system, and the other is a fully programmable for VERY high horsepower, or race applications.

The kits listed here will work with the 5.7 and 6.1 HEMI. We can accommodate as much horsepower as you want to make and manage. These kits are tunes for relatively stock motors, but we can custom tune them for your application. Please call with any questions.

TRANSMISSION

There are a lot of choices here for automatics; all manual transmission will use the same computer and harness.
